A PLANYC INITIATIVE WITH NYC PARKS AND THE NEW YORK RESTORATION PROJECT

New Forest Stewards Needed for Marine Park in Brooklyn

As part of the MillionTreesNYC initiative, New York City Parks and Recreation Natural Resources Group (NRG) is restoring parkland and other public open spaces to ecologically healthy, multi-story forests through the PlanYC Reforestation program at NRG.

In order for newly planted trees to grow into healthy forests, stewardship is needed so that invasive weeds do not overwhelm the new plantings. As the trees grow, understory shrubs and herbaceous plants will be planted to create the multistory forest that will sustain the new ecosystem.

Stewards are needed to help weed and monitor new reforestation plantings in Marine Park. Stewards will be trained in natural areas stewardship, invasive weed identification, and proper management techniques. Stewards must attend 3 training sessions and commit to volunteer 12 hours over the summer.

Benefits of Forests in the City include:

- improve air and water quality
- mitigate climate change
- improve neighborhoods
- reduce energy costs
- lower summer temperatures
- preserve wildlife habitat
- increase biodiversity

New Forest Stewards Training Classes at Marine Park

Wednesday, June 2 from 6:30-9:00 PM at the Salt Marsh Nature Center
Sunday, June 6 from 10 AM – 12 PM at the Gerritsen Ave Planting site
Sunday, June 13 from 10 AM – 12 PM at the Gerritsen Ave Planting site

Interested in becoming a new forest steward?
